Endangered Animals about animals and plants in Namibia as you accompany Ben, the honey badger, on his adventures. These Family Activity Sheets are suitable for the whole family. EPISODE 3 Adult participation is recommended when enjoyed by younger children. Today our teacher told us that some people think rhinoceros horn can be used as medicine. Some people come to Namibia to poach rhinoceros and take their horn even though it is not allowed and there are not a lot of rhinoceros left in the world. She says that these poachers are very wrong because rhinoceros horn is made of the same stuff as our nails and hair and is not useful as a medicine. My Mommy says that poachers are trying to take her horn. Ben and his new friend Rosie They found Baby Rhino. wanted to play with Baby Rhino. He was not looking happy What can I know about poachers. we do to stop the They catch animals to eat them poachers? or sell them or take their horns or tusks

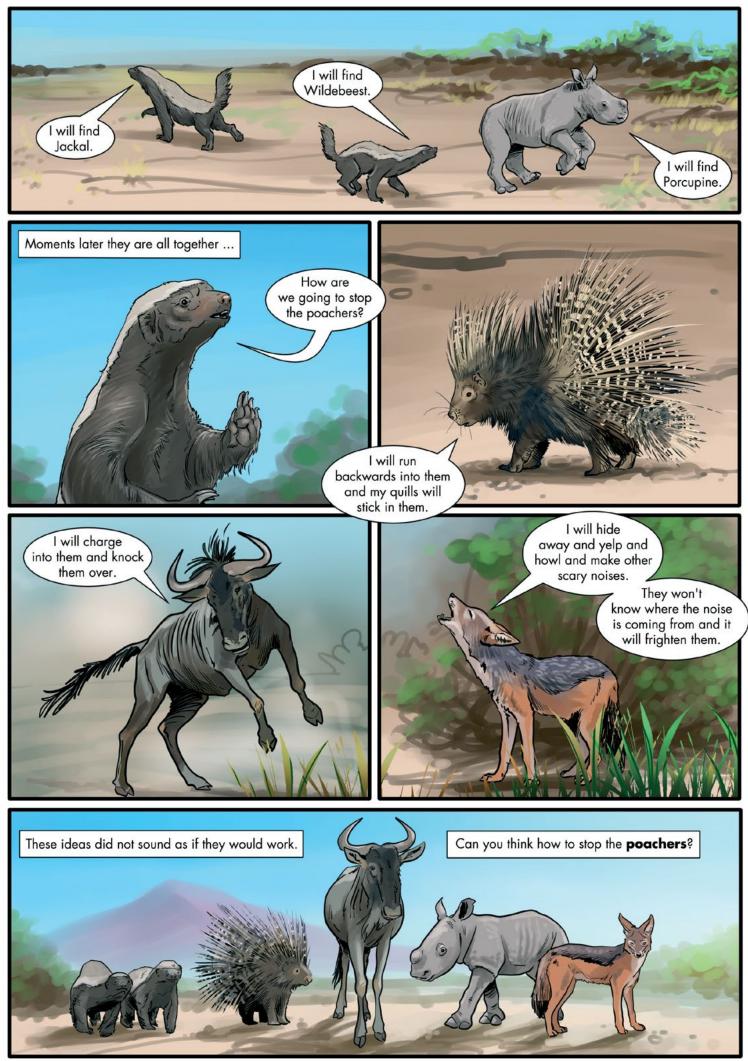

Learn

These weekly Family Activity Sheets are an initiative of Sabine Plattner African Charities (SPAC) in collaboration with Leadership for Conservation in Africa (LCA). SPAC contributes to the protection of nature through education and community-driven empowerment across Africa. SPAC supports the Namibian government through the EduConservation project, which is implemented in schools in Namibia. Children will be able to enjoy doing these activity sheets, with their families, at home. www.spacafrica.org/educonservation | educonservation@spacafrica.org

Let's ask our friends what they think.

What does "endangered" mean?

Endangered means that there are only a few of that kind of animal left.

For example, if there are no more adult Black rhinoceros then no baby Black rhinoceros can be born.

Not all wild animals are endangered. The honey badger has good survival skills and is not endangered.

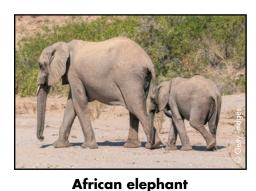

Black rhinoceros

White-backed vulture

The Namibian animals in these pictures are all endangered.

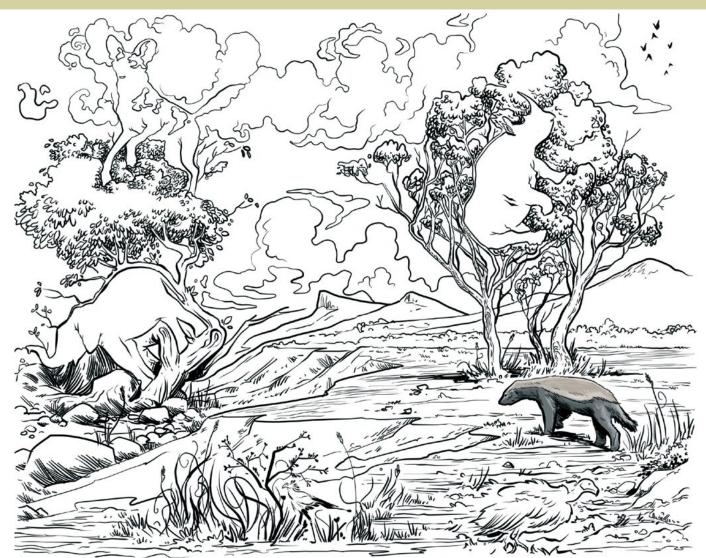

African wild dog

Find the animals

Ben, the honey badger, is having a stroll through the bush. Some of his endangered friends are hiding around the scene. Can you help Ben find:

Elephant, Black rhinoceros, African wild dog, Secretary bird and White-backed vulture?

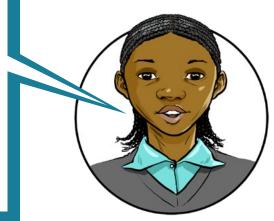

What can we do?

Most of our endangered animals are protected by game rangers in national parks or conservancies. Game rangers have to learn about the animals around them before they can protect them. Start developing the skills of a game ranger by finding out about the wild animals and creatures living in your neighbourhood.

Show us what you find out by drawing pictures of, or writing down, the names of the animals you see in your neighbourhood on this page.

Ask your teacher, or parents if you don't know the name of a creature. You can use names from any language you know.

Draw and write down the names of birds here.	Draw and write down the names of small and large mammals here.
£4	
Draw and write down the names of insects here.	Draw and write down the names of reptiles and amphibians here.

Send us a picture of your activities on **WhatsApp**: +264 (0)81 257 8617 Some of them will be published on social networks. Follow us on **Facebook** and **Instagram: @EduConservation**
