

Photo © Sangha Pangolin Project

Take a good look at the photo. Can you see the pangolin's ears? It does not have ears outside its head, but it can hear very well.

OUANDA DISCOVERS

PLEASE GIVE THIS ACTIVITY SHEET TO YOUR CHILDREN

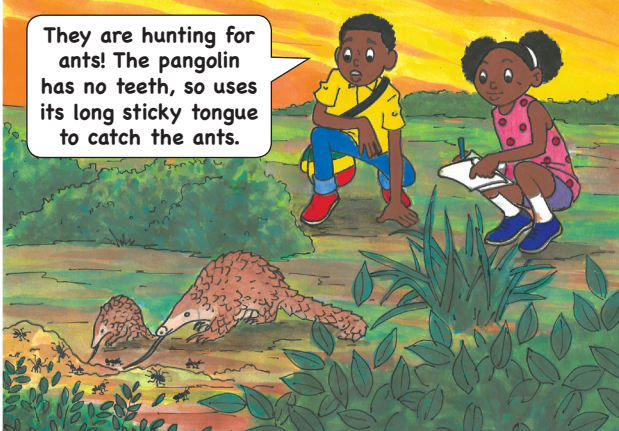

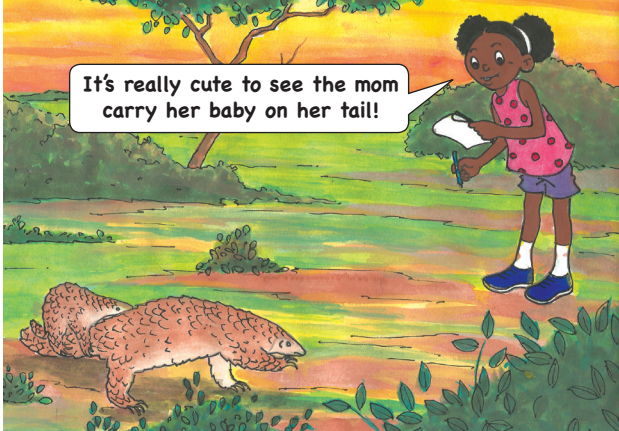

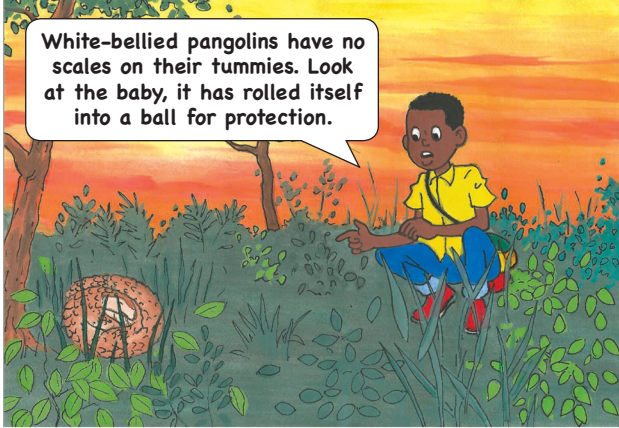

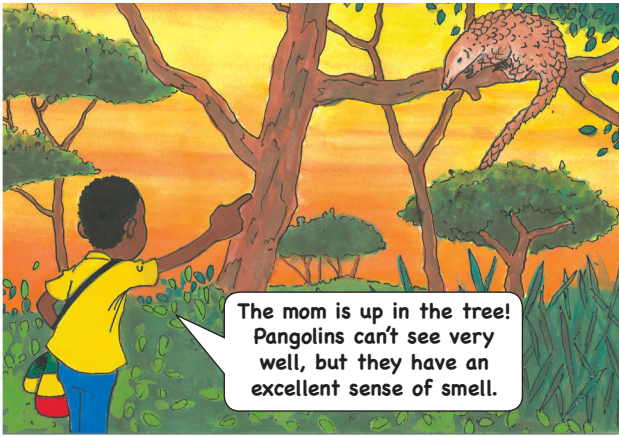

EPISODE 5

THE WHITE-BELLIED PANGOLIN

Every week, Ouanda discovers a new animal from one of the protected areas in the Republic of Congo. She will share her adventures so that you too can discover the natural beauty of your country.

The activities are suitable for children from 3 to 12 years old. Participation of parents is recommended for younger children.

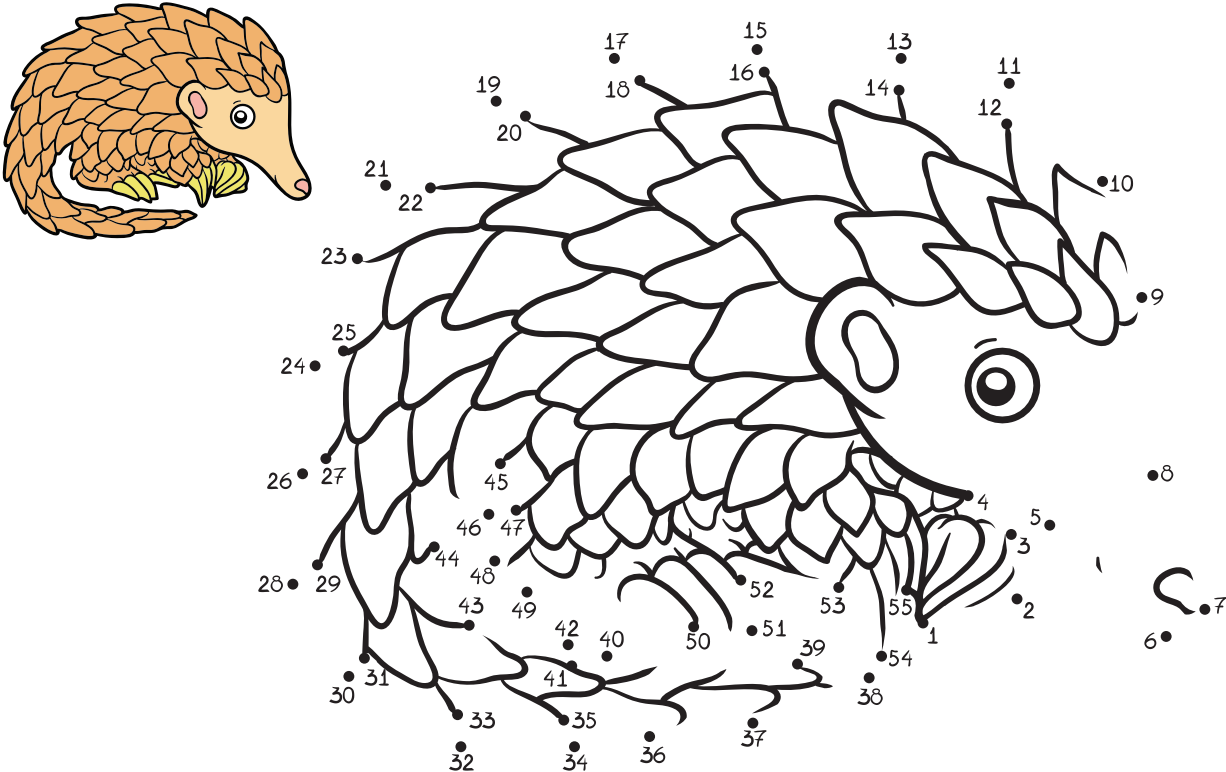

Ouanda continues her trip in the Logoué-Leketi National Park in the south-west of the Republic of Congo to discover the white-bellied pangolin.

Thank you for following Ouanda's adventures and see you soon!

ACTIVITY

Complete the pangolin! Draw lines between each number, starting with number 1. Once finished, you can also colour it in.

These weekly activity sheets are an initiative of Sabine Plattner African Charities (SPAC). SPAC contributes to the protection of nature through education and community-driven empowerment. SPAC supports the Congolese government through the EduConservation project, Early Childhood Development programmes and Research. During the Covid-19 pandemic, children will be able to enjoy doing these activity sheets at home.

DID YOU KNOW?

The pangolin usually eats 90 times during one night. It can eat millions of ants every year!

*If the pangolin eats up to 200,000 ants per day, how many ants does it eat per year? Tick the correct answer.

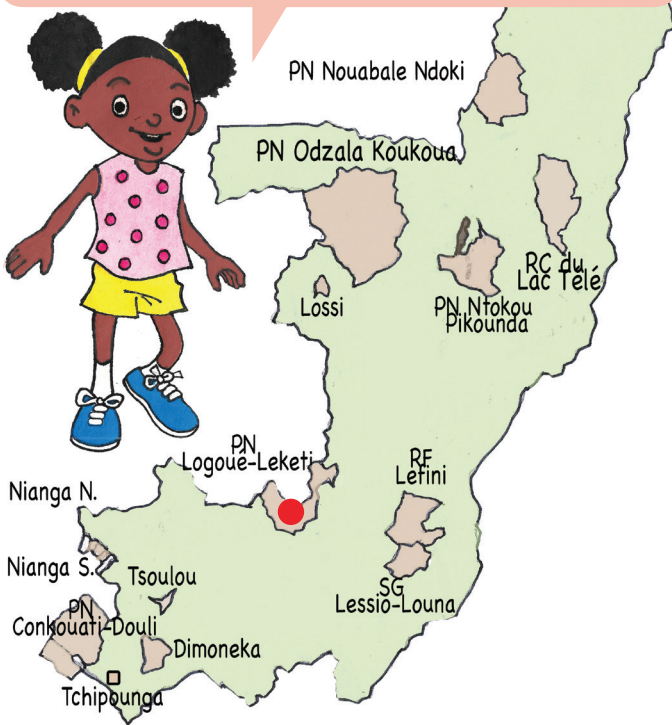

200 000 ☐ 73 million ☐ 700 million ☐

TRUE OR FALSE? Tick the correct answer.

- | | T | F |
|---|--------------------------|--------------------------|
| 1. The pangolin is hunted for its meat and for traditional medicine in other countries. | <input type="checkbox"/> | <input type="checkbox"/> |
| 2. The word "pangolin" means "to jump very high" in Malaysian. | <input type="checkbox"/> | <input type="checkbox"/> |
| 3. Their tongue can measure up to 40 centimetres. | <input type="checkbox"/> | <input type="checkbox"/> |

You will find the answers at the bottom right of the page.

The white-bellied pangolin can be found in all the country's forests. There are not many of them left because they are hunted and their habitat is being destroyed. They are found mostly in protected areas. Look at the red dot on this map, this is the Logoué-Leketi National Park, where Ouanda is currently exploring.

HAVE YOUR SAY

Name one animal that looks for its food at night and send your reply to **WhatsApp: +242 05 656 5543 or +242 06 579 4999.**

We will publish some replies on social media. Follow us on **Facebook** and **Instagram** : @EduConservation

* The pangolin eats 73 million ants per year.
1. True. It is the most-hunted animal in Africa.
2. False. "Pangolin" means "rolled in a ball" in Malaysian.
3. True. Its tongue is longer than its body!
